In 2015, the DPHHS **Public Health Emergency Preparedness (PHEP)** and **Hospital Preparedness Programs (HPP)** received federal funding to improve **readiness and response** to **Ebola** and other **Highly Contagious Infectious Diseases (HCID)**. The funds have been used to improve response capabilities at the local and state level in the past 2 years.

The funds were distributed across **public and private partners** across the State as shown above.
